**Extractor Cleaning Protocol**

To aid in the cleaning of the extractor, rinse out honey and wax using hot or warm water and liquid soap such as Dawn. Spray with a bleach solution by mixing 1 cup bleach in one gallon of cold water. Let soak for five minutes and rinse thoroughly with tap water. Wipe clean with a lint-free towel. Bottom line---the extractor must be CLEAN. Failure to return a clean extractor is not acceptable.

The extractor is available to all active club members on a first come, first serve basis, so don't wait until the last minute to get on the reservation list. The Rules and Procedures are for the speedy and reasonable execution of the process, but can and will be amended if the need arises.
